CONCRETE SLEEPER CAPPING SYSTEM

REFINE • DEFINE • ENHANCE

Transform concrete sleeper walls with our unique capping solution

Conceal is designed to look great, *and last*

Conceal's patented capping system brings the perfect finishing touch to concrete sleeper retaining walls.

An easy to install solution, Conceal transforms vertical steel post walls into refined, aesthetically pleasing landscape features.

Incredibly, Conceal requires just three pieces; a rebated capping member, a step-down insert, and a post cover. Combined, they enable virtually all sleeper wall post sizes to benefit from a decorative capped finish. They can also be painted to compliment your home, landscape design, colorbond fence or concrete sleeper of choice.

Perfect for residential, commercial and civil applications, Conceal concrete sleeper capping can be installed on new walls and retrofit onto existing retaining walls too.

Conceal also increases safety. Protection from sharp, exposed H beam post corners means less accidents around the home, and reduced liability for commercial operators.

Best of all, Conceal capping is strong, durable and lightweight. Installation is simple, and as an Aussie product, it is purposefully UV resistant to withstand everything our harsh climate can throw at it.

EASY AS ONE TWO THREE

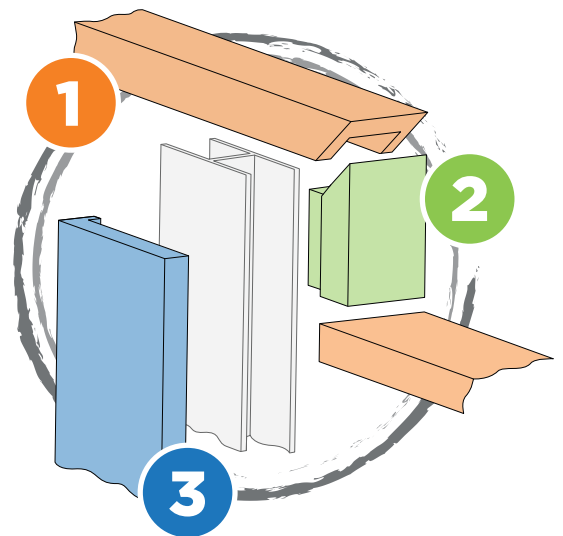

Conceal's capping system has just three components:

1. **Rebated Capping Member**
2. **Step-down Insert**
3. **Post Cover**

Combined, they completely conceal a retaining wall's galvanised steel posts and the concrete sleeper top course.

The system components can be purchased as a complete kit or separately.

To install simply measure, cut to length, glue down, silicone the joins and then paint. It doesn't get much easier

COLOUR MATCHING

Conceal's attractive cement render finish can be painted in the entire range of Colorbond colours to compliment your home, fencing, and landscaping designs.

Conceal will dramatically improve the aesthetics of your retaining wall.

THE PERFECT FINISH

Experienced concreters know that it's impossible to finish concrete perfectly in and around the H section of a steel post. Making light of this task, our 'Capping members' provide the straight & continuous line required to finish concrete surfaces to perfection

Conceal capping fits all popular post sizes from the 60UC RIDGI range (*in Bunnings hardware*) through to more commonly used structural ranges of 100, 150, 200 & 250UC (*see overleaf*).

Conceal capping fits all popular post sizes from the 60UC RIDGI range (*in Bunnings hardware*) through to more commonly used structural ranges of 100, 150, 200 & 250UC:

CAPPING SOLUTIONS 60UC (RIDGI RANGE)

CODE	LENGTH	COATING	DESCRIPTION
60A	1700mm	Sand & Urethane	Capping Profile
60B	700mm	Sand & Urethane	Step Down Profile
60C	1800mm	Sand & Urethane	Post Cover

CAPPING SOLUTIONS 100UC

CODE	LENGTH	COATING	DESCRIPTION
100A	2200mm	Sand & Urethane	Capping Profile
100B	2600mm	Sand & Urethane	Capping Profile
100C	1100mm	Sand & Urethane	Step Down Profile
100D	2000mm	Sand & Urethane	Post Cover

CAPPING SOLUTIONS 150UC

CODE	LENGTH	COATING	DESCRIPTION
150A	1800mm	Sand & Urethane	Capping Profile
150B	2200mm	Sand & Urethane	Capping Profile
150C	1100mm	Sand & Urethane	Step Down Profile
150D	2000mm	Sand & Urethane	Post Cover

CAPPING SOLUTIONS 200UC

CODE	LENGTH	COATING	DESCRIPTION
200A	1400mm	Sand & Urethane	Capping Profile
200B	1600mm	Sand & Urethane	Capping Profile
200C	1100mm	Sand & Urethane	Step Down Profile
200D	2000mm	Sand & Urethane	Post Cover

CAPPING SOLUTIONS 250UC

CODE	LENGTH	COATING	DESCRIPTION
250A	1400mm	Sand & Urethane	Capping Profile
250B	1600mm	Sand & Urethane	Capping Profile
250C	1100mm	Sand & Urethane	Step Down Profile
250D	2000mm	Sand & Urethane	Post Cover
